

ENGINEERING SOLUTIONS

info@trizengineering.com | www.trizengineering.com

Triz Engineering provides production-ready engineering solutions to OEM and Tier operations throughout the project lifecycle.

Our technical expertise range from vehicle design, engineering & control software,

electric powertrain development to multi-level vehicle simulation, where we can assist or lead the design, development and testing of medium and heavy-duty commercial trucks, buses and vans.

SOLUTIONS WE OFFER

Vehicle Development

Analysis & Simulation

Systems Integration

Advanced Powertrain Solutions

Vehicle Software Development

Production Engineering

Vehicle Data Analytics

Consulting

VEHICLE DEVELOPMENT CAPABILITIES

Chassis

Class 3
Class 4
Class 5
Class 6
Class 7
Class 8

Application

Step van
RV / MH
Refuse
Bus
Spotter
Sweeper
Vocational

Powertrain
